Scrotal sono (6/26/24) BL varicocele, L epi cyst

Renal sono (6/26/24) No abnormal findings

- Prostate 26cc
- PVR 22cc

(07/31/24) Reviewed sono, varicoceles. Patient notes mild persistent pain, but better since starting Doxycycline through an online doctor.

- Notes prior pregnancy, interested in fertility going forward
- Was previously on Enclomiphene - improved libido and energy

SA (8/21/24) 19 mil/cc, 2.5cc, 26% mot, NA Morph

Hormones (8/7/24) E2 19, FSH 3, LH 4.4, T/Free 549 / 8.8, PRL 13

(09/17/24) Reviewed sono, varicoceles, and pain. Pain has gotten better in recent months.

Plan

- Reviewed results - mild subfertility and normal hormones
- Discussed treatment options, including observation, and we discussed surgical options as well.
- Recommend repeat semen analysis 2-3 months
- Can proceed to surgery for continued pain, worsened hormones or sperm parameters
- Office for physical exam

Questions answered.

Agrees to follow-up.

2-3 months
